Unit:mm

Features:

- High-brightness led chip and high-efficiency, anti-glare and economical multi-size design, corresponding to the needs of different place.
- Secondary optical design, high light transmittance, unique PC light transmittance makes the light smooth and full.
- Secondary optical design, high light transmittance, unique PC light transmittance makes the light smooth and full.
- The spectrum does not contain red or ultraviolet light, which protects the eyes.

Application:

Widely used in workshops, mines, factories, shipyards, warehouses, highway toll stations, gas stations, large supermarkets, exhibition halls, gymnasiums and other places that require industrial and mining lighting.
